

Rohan Naidu (he/him)

website: rohannaidu.github.io
e-mail: rohan.naidu@hawaii.edu
address: C-102, 2680 Woodlawn Dr.,
Honolulu, HI 96822, USA

RESEARCH INTERESTS

first stars, galaxies & black holes, cosmic reionization, galaxy formation & evolution;
Galactic archaeology, near-field cosmology, dark matter

EDUCATION

Harvard University, U.S.A., Ph.D. in Astronomy 2017–2022
Advisor: Prof. Charlie Conroy
Thesis: *The Milky Way – An Immigrant Story:
Unraveling the Galactic Halo with the H3 Survey*

Yale-NUS College, Singapore, B.S. in Physical Sciences 2013–2017
magna cum laude, inaugural class of 150 of “Asia’s first liberal arts college”
Capstone Advisor: Prof. Pascal Oesch, Capstone: *Insights into Cosmic Reionization*

PROFESSIONAL APPOINTMENTS

Assistant Professor of Astronomy, University of Hawai‘i at Mānoa, U.S.A. 06/2026–
Pappalardo Fellow, Massachusetts Institute of Technology, U.S.A. 09/2025–05/2026
NASA Hubble Fellow, Massachusetts Institute of Technology, U.S.A. 09/2022–08/2025

ACADEMIC HONORS

IOP Publishing Top Cited Paper Award $\times 3$ 2023, 2024
*awarded annually to the “ten most cited papers published across the entire IOP
Publishing journal portfolio (ApJ, ApJL, AJ) within the past 3 years”*

- Rapid Reionization by the Oligarchs: The Case for Massive, UV-Bright, Star-Forming Galaxies with High Escape Fractions, [ApJ, 892, 109, 2020 \[346 citations\]](#)
- Evidence from the H3 Survey that the Stellar Halo is Entirely Comprised of Substructure, [ApJ, 901, 48, 2020 \[433 citations\]](#)
- Two Remarkably Luminous Galaxy Candidates at $z \approx 10 - 12$ Revealed by JWST, [ApJ, 940L, 14N, 2022 \[501 citations\]](#)

Fireman Prize, Astronomy Department, Harvard University 2022
awarded to a graduating student for “superlative work on their Ph.D. thesis”

Certificate of Distinction in Teaching, Harvard University 2021
*for a “special contribution to undergraduate teaching”
based on student evaluations for courses taught during the pandemic*

Ashford Fellowship, Harvard University <i>awarded to six incoming students who are “highly likely to make a substantial impact in their chosen field of study, as well as in society”</i>	2017-2022
Peirce Fellowship, Astronomy Department, Harvard University <i>awarded to 1-3 incoming graduate students who “possess significant promise as researchers”</i>	2017-2020
Chambliss Astronomy Student Achievement Award, American Astronomical Society	2017
Outstanding Capstone Project in Physical Sciences, Yale-NUS College	2017

SELECT OBSERVING PROGRAMS AS PRINCIPAL INVESTIGATOR

Total funding from approved *JWST* and *HST* observing programs as PI: > 2.1 million USD

JWST, MIRI+NIRSpec+NIRCam (co-PI with Anna de Graaff) <i>What Lies at the Hearts of the Little Red Dots?</i> <i>Efficient, Ultra-Deep Observations of the “Black Hole Stars” MoM-BH*-1 and The Cliff</i>	68 hours, 2026-27
JWST, NIRSpec (co-PI with Pascal Oesch) <i>What Makes Early Galaxies Shine So Bright?</i> <i>Insights from Ultra-Deep Spectroscopy of MoM-z14 at z=14.44</i>	32 hours, 2027-28
JWST, NIRCam grism (co-PI with John Chisholm and Jorjy Matthee) <i>How I wonder what you are – do JWST’s Little Red Dots twinkle?</i> <i>Testing broad-line & continuum variability on week, month, and six-month timescales</i>	49 hours, 2025-26
JWST, NIRCam grism (co-PI with John Chisholm and Jorjy Matthee) <i>How I wonder what you are – do JWST’s Little Red Dots twinkle?</i> <i>Testing broad-line & continuum variability on week, month, and six-month timescales</i>	49 hours, 2025-26
JWST, NIRSpec (co-PI with Seiji Fujimoto) <i>Let There Be Light: Directly Witnessing the Birth of Metal-Free Pop III Stars in an Ultra-Faint Galaxy at z = 6.5</i>	39 hours, 2025
JWST, NIRSpec (co-PI with Pascal Oesch) <i>Mirage or Miracle?</i> <i>Spectroscopic Confirmation of Remarkably Luminous Galaxies at z > 10</i>	33 hours, 2024-25
JWST, NIRSpec (co-PI with Christina Eilers, Jorjy Matthee, Fred Davies) <i>MASQUERADE: Mapping a Super-luminous Quasar’s Extended Radiative Emission</i>	21 hours, 2025
JWST, NIRCam grism (co-PI with Jorjy Matthee) <i>All the Little Things: Pop III Signatures & the Ionizing Budget of Dwarf Galaxies in the Epoch of Reionization</i>	47+29 hours, 2023
JWST, NIRSpec (co-PI with Christina Eilers, Jorjy Matthee, Fred Davies) <i>Mapping Quasar Light Echoes with Lyman-alpha Forest Tomography during the Epoch of Reionization</i>	21 hours, 2024

JWST, NIRCam grism <i>Where Cosmic Dawn Breaks First: Mapping the Primordial Overdensity Powering a $z \sim 9$ Ionized Bubble</i>	7 hours, 2023
JWST, NIRCam grism (co-PI with Jorjy Matthee) <i>Anatomy of an Ionized Bubble at $z = 6.6$: Which Galaxies Reionized the Universe?</i>	18 hours, 2023
Hubble Space Telescope, WFC3/UVIS <i>Confirming Extreme Lyman Continuum Emission in a $z = 3.27$ Star-Forming Galaxy</i>	5 orbits, 2018
Magellan, MagE (co-PI with Vedant Chandra) <i>To 100 kpc and Beyond: Bringing the Gaia Revolution to the Brink of the Galaxy</i>	27 nights, 2022-
Magellan, MIKE (co-PI with Alex Ji) <i>Extending the Chemical Reach of the H3 Survey of the Galactic Halo</i>	20 nights, 2021-23
Magellan, FIRE <i>Rest-UV Spectroscopy of Galaxies Reionizing the Universe at $z = 6 - 7$</i>	10 nights, 2019-20
Magellan, IMACS <i>A Lyα Survey to Harvest Lyman Continuum and Prepare for JWST</i>	4 nights, 2018

SELECT OBSERVING PROGRAMS AS CO-INVESTIGATOR

PIs: Charlie Conroy, Dennis Zaritsky, MMT, Hectochelle <i>The H3 Spectroscopic Survey of the Stellar Halo</i>	200+ nights, 2018-24
PI: Pascal Oesch, JWST, NIRCam <i>FRESCO: The First Reionization Epoch Spectroscopic COmplete Survey</i>	53 hours, 2022-23
PI: Sirio Belli, JWST, NIRSpec <i>The Stellar and Gas Content of Galaxies at Cosmic Noon</i>	46+35.7 hours, 2022-23
PIs: Hakim Atek & John Chisholm, JWST, NIRCam <i>JWST's GLIMPSE: gravitational lensing & NIRCam imaging to probe early galaxy formation and sources of reionization</i>	148 hrs, 2024
PI: Wren Suess, JWST, NIRCam <i>Medium bands, Mega Science: spatially-resolved $R \sim 15$ spectrophotometry of 50,000 sources at $z = 0.3 - 12$</i>	50 hrs, 2023
PI: Anna de Graaff, JWST, NIRSpec <i>A complete census of the rare, extreme and red: a NIRCam-selected extragalactic community survey with JWST/NIRSpec</i>	59 hrs, 2023-24
PI: Jorjy Matthee, JWST, NIRSpec <i>Dissecting Little Red Dots: the connection between early SMBH growth and cosmic reionization</i>	45 hrs, 2024-25

PI: Seiji Fujimoto, JWST, NIRSpec/NIRCam/MIRI <i>Panchromatic characterization of the super-Eddington accretion black hole, host, and environment: Epicenter of red dots, mergers, and dusty starbursts at $z = 7.2$</i>	18 hrs, 2025
PI: Mengyuan Xiao, JWST, NIRSpec <i>Red Monsters: Kinematics of Two ‘Universe Breaking’, Ultra-Massive Galaxies in the First Gyr</i>	17 hrs, 2025
PI: Rob Simcoe, JWST, NIRCam grism <i>Emergence of the Baryon Cycle in the First Billion Years</i>	21 hrs, 2025
PI: Vedant Chandra, VLT, FLAMES <i>A Chemical Survey of the Milky Way’s Ancient Heart</i>	75 hrs, 2023-24
PI: Charlotte Mason, MMT, Binospec <i>BLAS: The Binospec Lyα Survey</i>	15.5 nights, 2019-21
PI: Sandro Tacchella, MMT, MMIRS <i>Consensus on low-mass galaxies: how do low-mass galaxies grow?</i>	12 nights, 2019-21

PUBLICATION RECORD

35 primary author (first/second author) papers, 4200+ citations, h-index 28, [ADS library](#).

165 total papers, 12,400+ citations, h-index 61, [ADS library](#).

† marks 9 mentee-led papers.

Primary Author Papers

35. **R.P. Naidu**, J. Matthee, A. de Graaff et al., *Little Red Dots as Intermediate Mass, Super-Eddington Engines: Insights from Type II α Supernovae and The 1837-1856 Great Eruption of η Carinae*, [arXiv](#), submitted to OJAp.
34. D.A. Berg, **R.P. Naidu**, J. Chisholm et al., *A Fleeting GLIMPSE of N/O Enrichment at Cosmic Dawn: Evidence for Wolf Rayet N Stars in a $z = 6.1$ Galaxy*, [ApJ](#), **1003**, 112, 2026.
33. †A. Weibel & **R.P. Naidu** et al., *Black Hole Stars Across the Universe: Identifying Central Engine Dominated Little Red Dots at $z \sim 1.5 - 9.5$* , [arXiv](#), submitted to OJAp.
32. †W.Q. Sun, **R.P. Naidu**, J. Matthee et al., *Little Red Dot – Host Galaxy = Black Hole Star: A Gas-Enshrouded Heart at the Center of Every Little Red Dot*, [OJAp](#), **9**, 62505, 2026.
31. †Z. Liu, **R.P. Naidu**, A. Secunda et al., *How I Wonder What You Are – JWST’s Little Red Dots do not TWINKLE*, [arXiv](#), submitted to ApJ.
30. **R.P. Naidu**, P.A. Oesch, G. Brammer et al., *A Cosmic Miracle: A Remarkably Luminous Galaxy at $z_{\text{spec}} = 14.44$ Confirmed with JWST*, [OJAp](#), **9**, 56033, 2026.
29. †E. Leonova, **R.P. Naidu**, P.A. Oesch et al., *Lyman- α Visibility During the Epoch of Reionization: Combining JWST FRESCO Grism Data with Keck Archival Spectroscopy*, [arXiv](#).
28. I. Shivaeei, **R.P. Naidu**, F.R. Montero et al., *Diversity and Evolution of Dust Attenuation Curves from Redshift $z \sim 1$ to 9*, [A&A](#), in press.
27. †V. Chandra, **R.P. Naidu**, C. Conroy, et al., *All-Sky Kinematics of the Distant Halo: The Reflex Response to the LMC*, [ApJ](#), **988**, 156, 2025.

26. S. Fujimoto & **R.P. Naidu** et al., *GLIMPSE: An Ultra-faint $\simeq 10^5 M_\odot$ Pop III Galaxy Candidate and First Constraints on the Pop III UV Luminosity Function at $z \simeq 6-7$* , **ApJ**, **989**, 46, 2025.
25. J. Matthee, **R.P. Naidu**, G. Kotiwale et al., *Environmental Evidence for Overly Massive Black Holes in Low Mass Galaxies and a Black Hole - Halo Mass Relation at $z \sim 5$* , **ApJ**, **988**, 246, 2025.
24. **R.P. Naidu**, J. Matthee, H. Katz et al., *A “Black Hole Star” Reveals the Remarkable Gas-Enshrouded Hearts of JWST’s Little Red Dots*, **arXiv**, Nature, in press.
23. **R.P. Naidu** & J. Matthee et al., *All the Little Things in Abell 2744: >1000 Gravitationally Lensed Dwarf Galaxies at $z = 0 - 9$ from JWST NIRCам Grism Spectroscopy*, **arXiv**, submitted to OJAp.
22. †K. Sharpe, **R.P. Naidu**, C. Conroy, *What is Missing from the Local Stellar Halo?*, **ApJ**, **963**, 162, 2024.
21. J. Matthee, **R.P. Naidu**, G. Brammer, et al., *Little Red Dots: An Abundant Population of Faint Active Galactic Nuclei at $z \sim 5$ Revealed by the EIGER and FRESCO JWST Surveys*, **ApJ**, **963**, 129, 2024.
20. †V. Chandra, **R.P. Naidu**, C. Conroy, et al., *Discovery of the Magellanic Stellar Stream Out to 100 kpc*, **ApJ**, **956**, 110, 2023.
19. †V. Chandra, **R.P. Naidu**, C. Conroy, et al., *Distant Echoes of the Milky Way’s Last Major Merger*, **ApJ**, **951**, 26, 2023.
18. A. P. Ji, **R.P. Naidu**, K. Brauer et al., *Chemical abundances of the Typhon Stellar Stream*, **MNRAS**, **519**, 4467, 2023.
17. **R.P. Naidu**, P. A. Oesch, P. G. van Dokkum et al., *Two Remarkably Luminous Galaxy Candidates at $z \approx 10 - 12$ Revealed by JWST*, **ApJL**, **940**, L14, 2022.
16. **R.P. Naidu**, P. A. Oesch, D. Setton et al., *Schrodinger’s Galaxy Candidate: Puzzlingly Luminous at $z \approx 17$, or Dusty/Quenched at $z \approx 5$?*, **arXiv**, submitted to ApJ.
15. †J. J. Han, **R.P. Naidu**, C. Conroy et al., *A Tilt in the Dark Matter Halo of the Galaxy*, **ApJ**, **934**, 14, 2022.
14. J. Matthee & **R.P. Naidu** et al., *(Re)Solving Reionization with $\text{Ly}\alpha$: How Bright $\text{Ly}\alpha$ Emitters Account for the $z \approx 2 - 8$ Cosmic Ionizing Background*, **MNRAS**, **512**, 5960, 2022.
13. **R.P. Naidu**, C. Conroy, A. Bonaca, et al., *Live Fast, Die α -Enhanced: The Mass-Metallicity- α Relation of the Milky Way’s Disrupted Dwarf Galaxies*, **arXiv**, submitted to ApJ.
12. **R.P. Naidu** & J. Matthee et al., *The Synchrony of Production and Escape: Half the Bright $\text{Ly}\alpha$ Emitters at $z \approx 2$ have Lyman Continuum Escape Fractions $\approx 50\%$* , **MNRAS**, **510**, 4582, 2022.
11. **R.P. Naidu**, A.P. Ji, C. Conroy, et al., *Evidence from Disrupted Halo Dwarfs that r -process Enrichment via Neutron Star Mergers is Delayed by > 500 Myrs*, **ApJL**, **926**, L36, 2022.
10. **R.P. Naidu**, C. Conroy, A. Bonaca, et al., *Reconstructing the Last Major Merger of the Milky Way with the H3 Survey*, **ApJ**, **923**, 92, 2021.
9. †M.T. Gialluca, **R.P. Naidu**, A. Bonaca, *Velocity Dispersion of the GD-1 Stellar Stream*, **ApJL**, **911**, L32, 2021.
8. C. Conroy, **R.P. Naidu**, N. Garavito-Camargo, et al., *All-Sky Dynamical Response of the Galactic Halo to the Magellanic clouds*, **Nature**, **592**, 534, 2021.

Harvard-Heidelberg Star-Formation Meeting, <i>Starburst (Sgrburst) in our Backyard</i>	2020
SAZERAC, <i>Rapid Reionization by the Oligarchs</i>	2020
Early Galaxy Evolution in the ALMA & JWST Era, <i>Rapid Reionization by the Oligarchs</i>	2019
Escape of Lyman Radiation, OAC Crete, <i>LyC at $z \approx 2 - 3$ with the HDUV Survey</i>	2018

TEACHING & ADVISING

Teaching

Head Teaching Fellow, <i>Stellar & Planetary Astronomy</i> , Harvard University	Spring 2021
Instructor: Prof. John Johnson	
Teaching Fellow, <i>Galaxies & Cosmology</i> , Harvard University	Fall 2019
Instructor: Prof. Charlie Conroy	
Teaching Assistant, <i>Intro. to Observational Astronomy</i> , Yale-NUS College	Spring 2017
Instructor: Prof. Bryan Penprase	

Advising

Andrea Weibel (Geneva Postdoc → Hawai'i Postdoc)	2025-
adviser on Little Red Dot projects; one paper published	
Wendy Sun (MIT Undergrad → Hawai'i Postbac)	2025-
adviser on modeling Little Red Dots; one paper published	
Zhaoran Liu (MIT Postdoc → Hawai'i Postdoc)	2025-
postdoc adviser on applications of grism spectroscopy; one paper published	
Kate Leonova (Amsterdam)	2022-24
adviser with Prof. Pascal Oesch on JWST+Keck Ly α project; one paper published	
Vedant Chandra (Harvard Astronomy)	2021-25
adviser with Prof. Charlie Conroy on outer halo survey; three papers published	
Katherine Sharpe (Harvard College → UC Berkeley)	2021-23
advised with Prof. Charlie Conroy on one published paper and Harvard Jr. Thesis	
Steve Diaz (UMass Lowell, SAO Latino Initiatives Program)	2021
mentored on all aspects of research life during 3 month internship	
Megan Gialluca (Northern Arizona University, SAO REU student)	2020-21
advised with Dr. Ana Bonaca on one published paper	
Lavonna Mark (Yale-NUS College)	2020-21
advised on PhD applications & interviews, Stanford PhD on prize fellowship	
Jerrick Wee (Yale-NUS College)	2017-18
mentored on all aspects of astronomy research, published two papers	

DIVERSITY, EQUITY, INCLUSION

- Science communication and outreach across diverse communities
 - Enthusiastic public speaker committed to making astronomy accessible to everyone.
 - Recent engagements include: [Ask MIT!](#) series for school students, [Astronomy on Tap Los Angeles](#) (*The Milky Way: A Galaxy of Immigrants*), [Kainaat Astronomy](#) (JWST results on first galaxies in the Urdu language).
- Lead Member, NASA Hubble Fellowship DEI Group (2023-25)

- One of nine lead members of DEI group focused on diversifying the fellowship and using the program’s privileged position to bring positive change in the community.
- One of two fellows with overall responsibility for the annual postdoc fellowship application feedback program (e.g., recruiting team of current/former fellows, matching students with suitable mentors, publicity).
- Helped ≈ 75 students, primarily from under-served backgrounds, with feedback on their fellowship applications.
- Survey Representative, Harvard Graduate Student Mental Health Survey (2021)
 - One of five Astronomy Dept. point-persons for the Harvard-wide initiative.
 - Coordinated 95% participation from department and helped disseminate results.
- Python instructor & STEM Mentor, SAO’s Latino Initiatives Program (2021)
 - Three month program for students from communities under-represented in STEM.
 - Introduced students to python with a focus on scientific computing.
 - Held weekly one-to-one mentoring meetings.
- Volunteer, Harvard Banneker Institute summer program (2018, 2020)
 - Ten week research-study experience to prepare students of color for graduate school.
 - Held weekly office hours on all aspects of research, provided catch-all programming assistance.
- Department Point-Person & Volunteer, Harvard Graduate Students Union (2017-19)
 - Fair pay, affordable healthcare, and protection from abuse are core goals of the union.
 - Canvassed STEM departments (≈ 200 calls + in-person conversations) and international students (e.g., [Harvard Crimson Op-Ed](#)) for union formation election.
 - Organized action with a focus on international student issues (e.g., Muslim ban, visa-related travel reimbursements, pandemic pay).

PROFESSIONAL SERVICE

- Panelist for NSF (1 $\times$; 2025), NASA (5 $\times$; 2023-26), and time allocation committees (e.g., Hubble Space Telescope, Keck) that have awarded > 10 million USD in funding.
- Scientific & Local Organizing Committees, First Light Conference, Boston (2023)
 - One of five SOC members, and one of six LOC members for > 150 person conference focused on early Universe results from the first year of JWST.
 - Designed scientific program, organized logistics, coordinated social events, assisted with overall responsibilities for smooth conduct of the event.
- Journal referee for the Astrophysical Journal (ApJ, ApJL), Monthly Notices of the Royal Astronomical Society (MNRAS), and Astronomy & Astrophysics (A&A, A&AL)
- Chief Coordinator, Harvard Astronomy’s Recruitment Week (2019)

- One of two grad students in-charge of every aspect of recruitment (e.g., designing the overall program, travel/restaurant arrangements, liaising with faculty/admin).
- Developed new programming (e.g., closed-door student panel with anonymous questions) and produced a detailed report for faculty identifying areas of improvement (e.g., CfA web portals) that spurred action.

OTHER INTERESTS

- Quizzing/Trivia/Quiz-bowl
 - Won several national & international events – youngest gold medalist at the Asia-Pacific Quizzing Championships and four-time national champion (Singapore), one-time international champion of the Tata Crucible campus quiz (among the world's largest university tournaments with 38 cities, 5000+ teams).
 - Wrote/presented 1000+ questions for TV shows, pub quizzes, and community events.
- Poetry
 - Published in journals including Helter Skelter Magazine's New Indian Writing, the Quarterly Literary Review Singapore, and Softblow. Shortlisted/longlisted for prizes including the Poetry Society of India's All-India Prize, University of Canberra's International Poetry Prize, and the Wingword Poetry Prize.
- Data-science for social good
 - Led the team behind the viral electoral literacy website, electionaire.info (>500,000 unique hits, > 10% of Singapore's population). Conceptualized the project, recruited team, oversaw research on stances of political parties, handled press.
 - Data miner for studies focused on domestic maids' rights in Singapore. Studies based on these data revealed live-in domestic maids from the Philippines, Indonesia and India who work in 1-of-4 households often enter contracts with zero off days per month.
